

3rd International Training School on Solid-State NMR

Leiden, The Netherlands
June 27 – July 2, 2010

Following the successful tradition of earlier meetings in Germany (2006) and Denmark (2008), we are pleased to announce the 3rd international training course on solid-state NMR. The course is intended for Ph.D. students with research interests and expertise in the field solid-state NMR spectroscopy. Lectures (for a complete program click [here](#)) will be given by international leaders in the field including:

Robert G. Griffin (MIT, USA)
Beat Meier (ETH Zurich, Switzerland)
Niels C. Nielsen (University of Aarhus, Denmark)
Hartmut Oschkinat (FMP Berlin, Germany)
Tatyana Polenova (University of Delaware, USA)
Bernd Reif (University of Munich, Germany)
Shimon Vega (Weizmann Institute, Israel)

and will cover all relevant aspects of biomolecular solid-state NMR including

- Theory
- Sample preparation
- Methodology
- Applications.

Our course will be given in the beautiful city center of [Leiden](#) that is conveniently located close to the international airport of Schiphol and easily reachable by public [transportation](#). Attendees are expected to arrange for their own accommodation. (please see, for example, tourist office [Leiden](#))

For registration & further information, please contact the organizers:
